

TO WHOM IT MAY CONCERN

Sopot, 17th April 2015

We are glad to confirm that **NAVINORD** has successfully assisted NAVIMOR International during the design and construction process of 36.3 LOA multipurpose research and fishing vessel RV Bayagbona. The vessel has been built for *Nigerian Institute for Oceanography and Marine Research* (NIOMR), Lagos.

NAVINORD supported designing and construction process with extensive professional services on the fields of:

- **selection of navigation and communication systems with respect to ship's technical specification and regulations in force;**
- **selection of research equipment (i.e. Scientific Echosounder, Fish-Finder, CTD Profiler, Towing Sonar);**
- **preparation of marine electronics schematics (CAD);**
- **study and designing of hull-blister covering four transducers;**
- **design and installation of Marine Science Network;**
- **supervision over marine electronics installation and sea-trials.**

Mr Piotr Cywiński of NAVINORD is a reliable partner in business and an expert in marine electronics field. We hope to cooperate with him again.

Filip Kwaśniewski
Commercial Director
